Ideation Phase
Brainstorm & Idea Prioritization Template

Date	31 January 2025
Team ID	Houserent Management
Project Name	699d5fb73074df695bbbb046
Maximum Marks	4 Marks

Step-1: Idea Listing and Grouping

We brainstormed core features to address the problem statements, focusing on trust and efficiency:

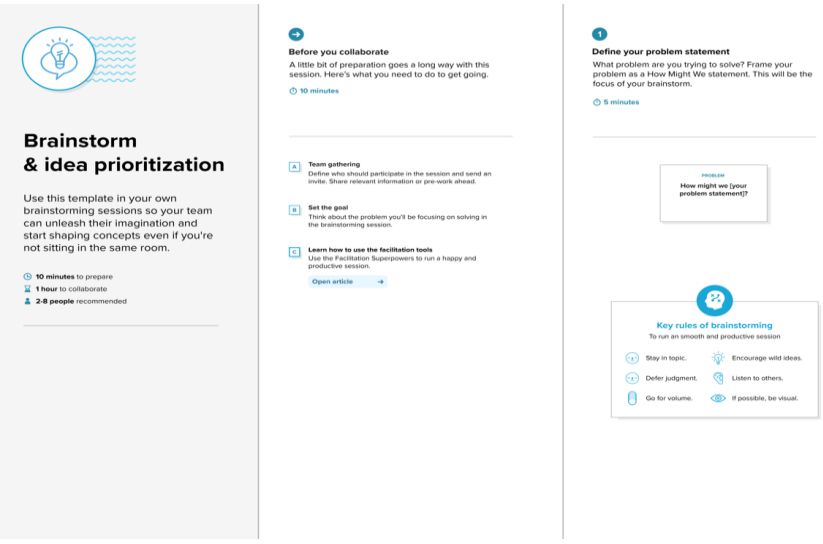
- **Group 1: Trust & Safety: Admin verification system, verified owner badges, secure JWT login.**
- **Group 2: Efficiency: Real-time search filters, automated price calculation, instant booking requests.**
- **Group 3: User Experience: Personalized dashboards, mobile-first design, clear property photo galleries.**

Step-2: Idea Prioritization (Feasibility vs. Importance)

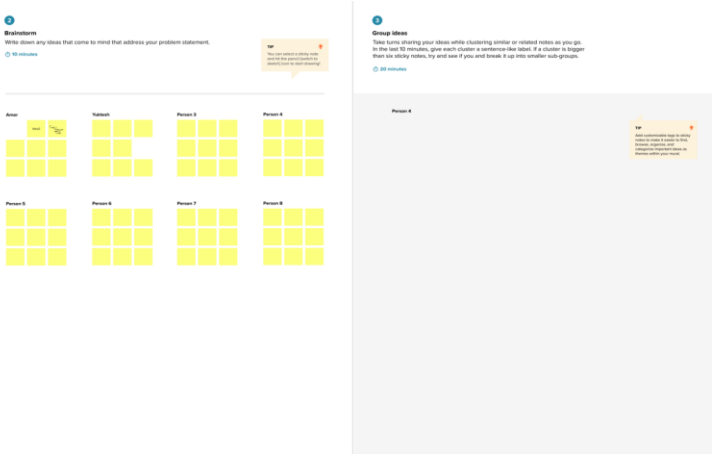
We mapped our brainstormed ideas on a prioritization grid:

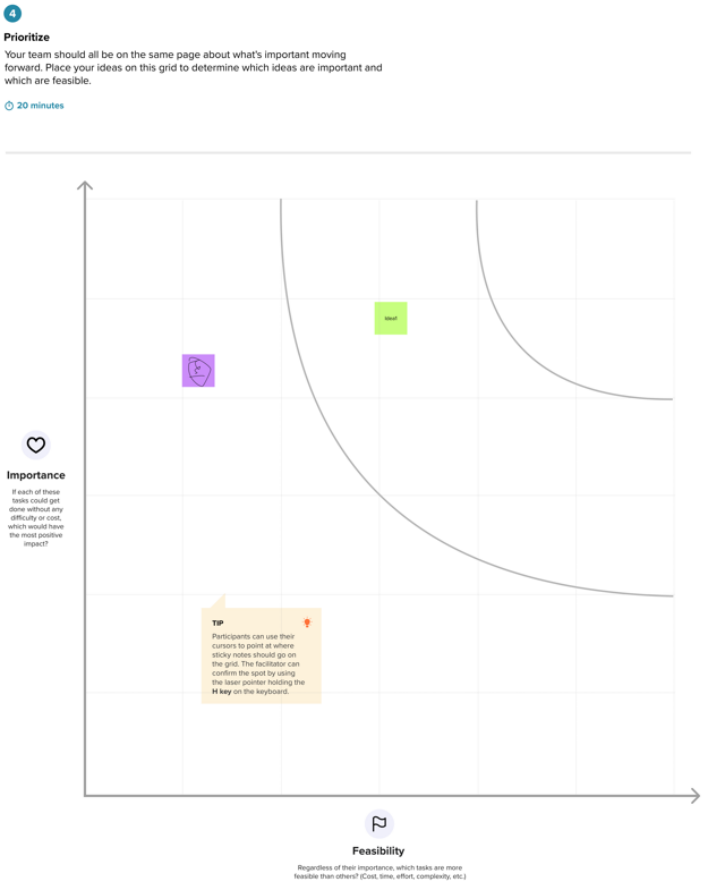
- **High Importance / High Feasibility: Admin approval workflow, Property search by city/price, JWT Auth. (These are our Phase 1 priorities).**
- **High Importance / Low Feasibility: Integration with AI for property price prediction. (Slated for Future Scope).**
- **Low Importance / High Feasibility: Dark mode UI, customizable profile colors. (Backlog).**

Step-1: Team Gathering, Collaboration and Select the Problem Statement



Step-2: Brainstorm, Idea Listing and Grouping





Step-3: Idea Prioritization
