Project Design Phase

Proposed Solution Template

Field	Value
Date	09 March 2026
Team ID	699d5fb73074df695bbbb046
Project Name	HouseRent Management System
Maximum Marks	2 Marks

Proposed Solution Template:

The project team has filled the following information in the proposed solution template to define the core value proposition of the system.

S.No.	Parameter	Description
1.	Problem Statement	Difficulty in finding verified rental properties and lack of centralized management for property owners and renters in a fragmented market.
2.	Idea / Solution description	A full-stack MERN application that provides a centralized platform for property listing, admin-verified approvals, and seamless booking for renters.
3.	Novelty / Uniqueness	Incorporates a secondary verification layer (Admin Dashboard) and role-specific dashboards to ensure trust and transparency between all parties.
4.	Social Impact / Customer Satisfaction	Reduces house-hunting stress for urban migrants and provides property owners with a reliable digital storefront for their assets.
5.	Business Model (Revenue Model)	Subscription-based listings for owners, premium placement fees, and potential lead generation for real estate services.
6.	Scalability of the Solution	Modular Express.js backend and MongoDB Atlas allow for horizontal scaling as user traffic and property volume increase.
